

Dear FCC:I would like to urge you to reject the NAB's petition 04-160. I don't even understand how a petition like this can make it to you. We have free competition and choice in this country so I don't see why this petition isn't summarily dismissed.

I am a subscriber to satelite radio and love the choices it give me and I don't see why I have to sign off of satelite to normal AM radio to get traffic and weather reports.

If the NAB wants to compete then let them do so but not by giving them protection.

Regards,

Ralph Cotter
